I was parked on SR 25 at Grogan, operating W-19, and using a Python radar (PYT846000926) in the stationary mode. I was facing SB when I had a SB vehicle in the passing lane go by. This vehicle was pulling away from traffic and appeared to be traveling near 60 mph. I obtained a target speed of 62 mph, and the audio return supported the target speed. I stopped this vehicle and made contact with the driver, Mr. Kontak. He advised he was late for work. I returned to my vehicle and prepared a citation. When I returned Mr. Kontak asked if it mattered that he was in the process of passing, and I advised no. He also mention he was traveling 50 mph. He had no passengers. A calibration check was completed on the radar unit.
