

Big Country

A full-width porch provides plenty of room to enjoy the outdoors. On the roof, a trio of dormers adds extra curb appeal.

If you're looking for an open, highly functional one-story layout, take a look at this plan. An optional bonus room over the garage adds another 288 square feet.

Each of the four bedrooms boasts a walk-in closet, with the master suite offering the most comfortable accommodations of all; the suite includes a large bedroom and adjoining sitting room, along with a fabulous master bath.

The whole family will enjoy relaxing in the spacious great room, which flows easily to the dining area and

kitchen. Sit by the fireplace, or step out to the back porch.

In the kitchen, there's plenty of counter space at the central island and the peninsula. Seat kids at the snack counter for quick breakfasts, or set up appetizers here when company comes over.

The mudroom is the perfect place to store shoes and coats on the way in from the two-car garage. Need more space? The bonus room upstairs would make a great home theater, complete with a half-bath.
